WWF® Nord occidentale

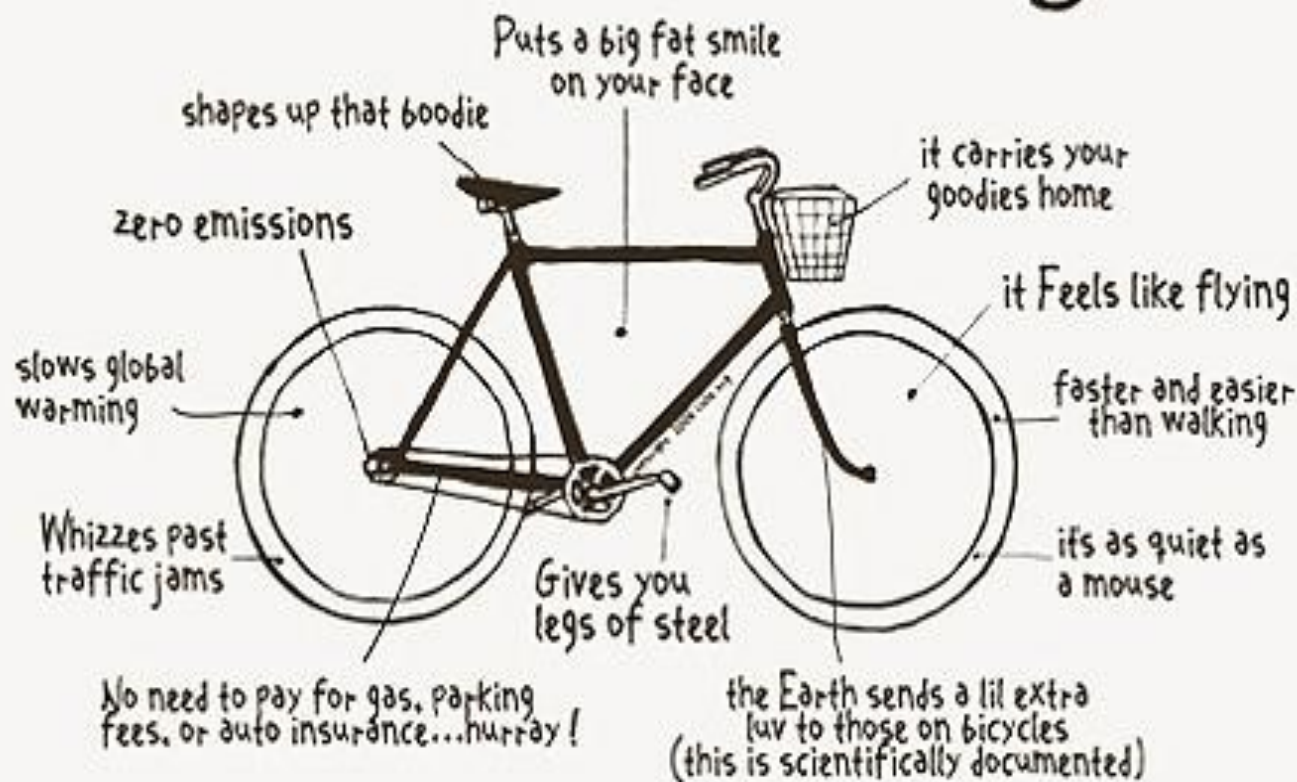

Meeting at the school.

We are leaving....

|

Benefits of a Bicycle

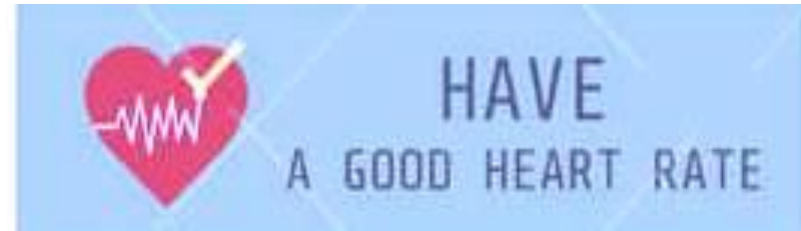

Why cycling

Choose **the bicycle** as a means of transportation has many advantages: the bike is in fact a means versatile, environmentally friendly, economical, convenient and healthy. It is perfect for getting around the city, to go to work, to keep fit, to relax, to explore the countryside and do ecological travel and contact with nature .

We get to the beach where our WWF friends are waiting for us

We are breathing sea breeze

An interesting lesson on our environment protection

Smiling at Mondello Beach

There is always someone late...But we appreciate the effort at the participation, especially if he/she comes from far away...

What matters is sharing and cooperating
